

**FOR IMMEDIATE RELEASE**

**Grammy Award-Winning R&B Artist Jamie Jones Announces the Release of His Solo Single, “Sunny”**

*The lead singer of All-4-One creates feel-good summer vibes, with this classic melody and soulful vocal delivery.*

**Los Angeles, CA – July 9, 2021.** Jamie Jones is best known for his lead vocals with multi-platinum, Grammy Award-winning R&B group, All-4-One, who are internationally known for their number-one hit, “I Swear”, “I Can Love You Like That” and “So Much In Love”. As a well-established figure in the music industry, Jones has received Grammy, American Music, Emmy, and Billboard awards and nominations for both his vocal and production endeavors. Now, he’s stepping into the spotlight yet again with the release of his latest single, “Sunny.” Originally recorded by Bobby Hebb, this joyful summer jam couldn’t have come at a better time. With buttery smooth beats and timeless lyrics, Jones’s rendition of “Sunny” makes listeners feel like they stepped into the most perfect summer day, even if only for a few minutes.

“I wanted to record something light that felt good,” says Jones. “We’ve all been through so much in the last year, and I figured we could all use a little more sun in our lives. I dare you not to smile when you listen to this!”

The power Jones puts into every word in “Sunny” is infectious. Inspired by the hardships that 2020 brought to so many people, he hopes this single spreads a dose of positivity and happiness to everyone who hears it. As he sings, “The dark days are gone, and the bright ones are here.” Nothing could be more appropriate for the time in which we live. “Sunny” is produced by Jones’s own production company, The Heavyweights along with his longtime collaborators Monte Neuble and Tim Stewart. The Heavyweights team’s projects have more than 500 million streams to their credit, and counting.

Get ready for the premiere of “Sunny” and listen to 2021’s summer anthem starting Friday, July 9th, [on all digital platforms](#), including Spotify and Apple Music. Catch the music video on YouTube
